	24-415	Gloss	1.5mm, 3mm, 6mm & SSQZ (VALVE VERSION) 1.5mm & 3mm Oil version	Except SSQZ all Orifice are available in Plug Seal and Crab Claw	Yes

Oval Snap Tops

Differentiate on shelves, smooth streamlined package aesthetic, use for inverted or upright packaging. Snap on finishes allow for perfect front panel orientation and offer capping efficiencies. Oval footprint incorporates flat lid design for inverted stability.

Type	Product Name	Neck Finish	Finish Style	Orifice Sizes	Sealing System	Liner Capable
SSFT	39*23 Oval Snap top	15mm Snap On	Frost	2mm & 3mm	Plug Seal	No
	58*34 Oval Snap top	22mm Snap On	Frost	2mm, 3mm, SSQZ & Powder version	Plug Seal	No
	64*39mm Snap top	25mm Snap On	Frost	2mm, 4.75mm, SSQZ & Powder version	Plug Seal	No
Oval Snap Top	Bravo	20mm Snap On	Matt body & Glossy Lid	3mm, 5mm	Plug Seal	No
	Bravo	20mm Snap On	Matt body & Glossy Lid	SSQZ & Powder version	Plug Seal	No

Elastomeric Flow Control

Elastomeric Flow Control

Elastomeric Flow Control is a specialty valve technology by Aptar dedicated to improving the consumer dispensing experience.

Our specialty technology offers superior flow control for every application ranging from controlled, drip-free dispensing to multiple stream spray. We deliver flow control solutions to Personal Care and Home Care packaging with a delightful and gentle squeeze.

With over 30 billion valves produced to date, we are the experts in valve technology, delivering simple, fun + innovative squeezable solutions.

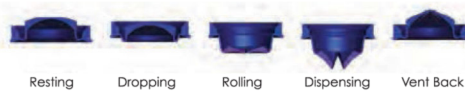

SimpliSqueeze^{SSQZ}

For cleaner dispensing

Our silicone valve dispensing system is recognized throughout the world for its superior product control and non-drip dispensing.

SimpliSqueeze provides optimal dispensing control. The flow of product is easily controlled by squeezing the bottle and cuts-off as soon as the pressure is released.

There is no risk of spills, even when the closure lid is left open in the inverted position.

Pearl4U

A squeezable dropper for convenient dispensing of fluid formulas. The highly functional design guarantees a convenient use by offering:

- Convenient direct-to-scalp application
- Controlled Dispensing
- Soft touch silicone application is always clean

Specification

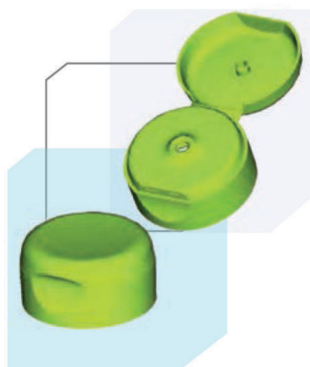

- Orifice Size : 0.375" SSQZ Valve
- Neck finish : 20-415
- Sealing Feature : Plug Seal
- Surface finish: Glossy

Tube Tops

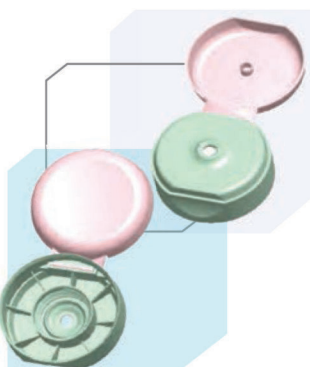

We offer a complete line of tube top closures with an extensive range of sizes and finishes, providing your customer with one-handed dispensing convenience for tube and inverted packaging applications.

Utilizing Aptar's innovative engineering technologies, our product line has expanded to handle all viscosities of products for Personal Care. Some of these closures are available with our revolutionary **SimpliSqueeze** (SSQZ) valve technology and feature a Snap-on design for precise front-panel orientation.

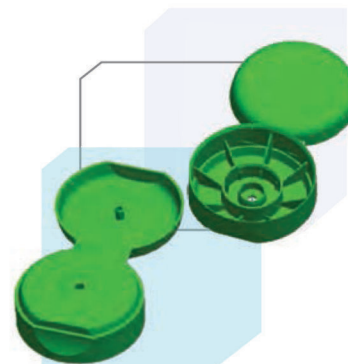

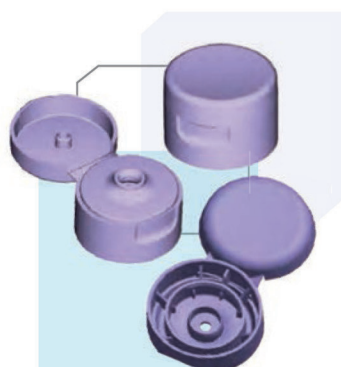

Classic:

Enhance your product packaging with timeless style. Sharp, parallel edges and minimized finger recess create a clean, classic look. A complete line of Tube Tops and Snap Tops

Product Name	Neck Finish	Finish Style	Orifice Sizes	Sealing System	Liner Capable

Disc Tops

Disc Top closures are two piece dispensing closures which open by pressing the actuator at the finger recess. Disc Tops come in a variety of shapes, threaded finishes, surface finishes and sizes. This type of closure is suitable for a wide variety of product applications, although they are not recommended for use with very low viscosity (water-like) products.

Finger recess has been carefully designed for comfort and ease of opening:

- Convenient one-handed open and use
- Actuator available in different style:
- Liners available
